

DEGREE: MSc Data Analytics

Module: Computer Vision and Artificial Intelligence

Assignment Title: Medical Diagnostic Image Segmentation Using Advanced Deep Learning: Comparative Analysis and Development of a Novel Architecture

Assignment Type: Set exercise (not under exam conditions, e.g. critiques)

Word Limit: 3000 words (+/- 300)

Weighting: 100%

Issue Date: 18/06/2026

Submission Date: 17/09/2026

Feedback Date: 08/10/2026

Issued by: Dr. Fahmid Al Farid

Plagiarism:

When submitting work for assessment, students should be aware of the InterActive/Canvas guidance and regulations in concerning plagiarism. All submissions should be your own, original work.

You must submit an electronic copy of your work. Your submission will be electronically checked.

Learner declaration	
Word count	

Use of proof-reader/proof-reading service (see guidance contained in Academic Misconduct Regulations on appropriate use)	YES	NO
If 'yes', please specify which service (e.g. Grammarly, Studiosity etc.)		
I confirm that I submit this work as my own work and that I have cited all sources I have used, and I understand that using sources without citing them correctly may be considered as Academic Misconduct.	YES	NO
I confirm that I have followed guidance on the acceptable use of AI tools for this assignment where such guidance has been issued by my tutors.	YES	NO
Where use of appropriately cited use of AI tools is permitted, I confirm that I have cited in accordance with the UCA Harvard Referencing Standard.	YES	NO

Harvard Referencing:

The Harvard Referencing System must be used. The Wikipedia, UKEssays.com or similar websites must **not** be used or referenced in your work.

By submitting this assessment, you are confirming that you have understood and are complying with the University's Academic Misconduct Regulations.

Plagiarism Detection (Turnitin)

BSBI uses Turnitin (an on-line text matching tool) to help identify cases of plagiarism. Turnitin will compare a submitted assignment with a database of journal articles, books, web pages and previously submitted assignments.

Signature (Student): _____ Date: _____

Introduction

Learning Outcomes:

LO1. Demonstrate the understanding of various techniques for working with images and computer vision using artificial intelligence.

LO2. Use deep learning and artificial intelligence to write algorithms and use models for image processing.

LO3. Implement Python code for applying computer vision and artificial intelligence for applications like face recognition, feature detection and matching, motion estimation, motion tracking, image classification, and object recognition.

Assessment Criteria: Weighting 50%

3000 words

Tasks:

(the task is related to **LO1**, **LO2**, and **LO3**). Please research and find computer vision techniques which are designed for the purpose of image segmentation. You need to practically implement them regarding the number of learning parameters and their scalability. You are also going to itemise the advantages and disadvantages of any of them.

Analysis Scenario:

A leading medical research institute is focused on leveraging advanced technologies to systematize and automate the configuration process for efficient precise evaluation on a diverse pool of medical diagnostics. Traditional pathological methods of medical image analysis have limitations, especially in extracting detailed information from complex images. The institute aims to implement image segmentation techniques to enhance the precision of identifying and delineating specific objects within medical images.

To address these challenges, the institute seeks to deploy advanced image segmentation models grounded in deep learning. The objective is to develop a highly robust segmentation framework capable of accurately identifying, localizing, and outlining clinically relevant regions within various medical imaging modalities (e.g., MRI, CT, ultrasound). The anticipated system will support improved diagnostic interpretation, facilitate quantitative analysis, and contribute to more consistent and reproducible clinical decision-making. Through the implementation of these state-of-the-art segmentation techniques, the institute aims to significantly enhance the precision and reliability of automated medical image evaluation.

Task Requirements:

You must use a medical imaging dataset of your choice from a freely available online source. Clearly mention the exact source (URL or repository location) where the dataset was found.

When presenting your implementation, include screenshots (not copy-pasted code) of your Python code and resulting output images. This is required to verify that you have implemented the solution.

Abstract

Provide a concise overview of the project, summarizing the objective (e.g., automated medical image segmentation for precise diagnostics), dataset used, deep learning method applied, and key results. Highlight the scope and significance of the work in enhancing clinical outcomes.

1. Introduction:

Outline challenges in medical image analysis, emphasizing limitations of manual segmentation and the need for accurate diagnostics. Explain how deep learning and image segmentation offer effective solutions. Clearly state the objective: developing a model for automated segmentation of medical images (e.g., MRI, CT scans).

2. Literature Review:

Summarize existing approaches for medical image segmentation using computer vision, focusing on key models (e.g., U-Net, DeepLabV3, nnU-Net) and their outcomes. Highlight gaps such as computational complexity, scalability, or real-time applicability that the proposed approach aims to address.

3. Problem Formulation:

Define the practical issue: manual segmentation of medical images is time-consuming and error-prone, especially for complex morphologies. Emphasize the need for a reliable, automated segmentation system. Clarify project goals: building a model to segment anatomical or pathological regions accurately.

4. Dataset Preparation:

Describe the medical image dataset used (e.g., TCIA, ISIC), including the number of images, classes (e.g., organs, tumors), and labeling scheme. Detail preprocessing steps—resizing, normalization, augmentation—and train-test split strategy to ensure reproducibility and robustness.

5. Model Architecture:

Describe the deep learning model (e.g., U-Net, pre-trained or custom-built), justifying its selection based on performance, computational efficiency, and suitability for medical imaging. Provide a brief overview of the architecture, including key layers or components (e.g., encoder-decoder, skip connections).

6. Implementation:

Summarize the code structure using Python and a deep learning framework (e.g., PyTorch, TensorFlow). Explain core components: data pipeline, model instantiation, training loop, and evaluation. Include brief code snippets only if necessary to illustrate critical logic or functionality.

7. Model Evaluation:

Present the model's performance using metrics like Dice coefficient, IoU, precision, and confusion matrix. Discuss performance on test data, identifying challenges such as noise sensitivity or class imbalance. Compare results with state-of-the-art models.

8. Conclusion:

Summarize the model's impact on medical diagnostics and its demonstrated effectiveness. Discuss limitations, such as dataset diversity or computational constraints. Suggest future

improvements, including multi-modal imaging, real-time clinical deployment, or adaptation for other applications like object detection.

Submission Instructions:

- Create a practical analysis within the designated word limit (2000 - 3000 words).
- Integrate Python code snippets, visualizations, and pertinent documentation seamlessly into the analysis.
- Maintain clarity, organization, and logical flow in presenting your result analysis.
- Utilize the BSBI assignment template provided on Canvas for document preparation.
- Employ the Harvard referencing style for your bibliography.
- Refer to the Essay-Guide on Canvas for additional instructions.
- Submit your assignment electronically by the stipulated deadline.

Students are encouraged to explore additional reputable sources in the digital library beyond the list provided to strengthen their individual research and critical analysis skills. The unit lecturer can help with recommending additional literature.

The criteria for successfully passing the units with two assessment components require passing both components successfully. Passing marks for BSc and MA/MSc levels are different and are stated at the end of the assignment brief. Please find the examples below:

- **Example 1** (e.g., pass mark: 50)
 - Component 1 (50% weighting) - 55
 - Component 2 (50% weighting) - 55
 - Final average: 55
 - Result: **Pass (both components passed and therefore the unit is passed)**
- **Example 2** (e.g., pass mark: 50)
 - Component 1 (50% weighting) – 80
 - Component 2 (50% weighting) – 30
 - Final average: 55
 - Result: **Fail (because although the average is above 50, one of the components is a failure)**

EXPERIMENTATION & INNOVATION								
	FAIL			PASS				
Threshold Criteria	0-29%	30-39%	40-49%	50-59%	60-69%	70-79%	80-89%	90-100%
Deals with complex issues both systematically and creatively demonstrating self-direction and originality in tackling and solving problems	Little to no ability to use techniques to deal with complex issues systematically (including those of ethics and sustainability) and creatively to solve problems and/or make decisions.	Low utilisation of established techniques to deal with complex issues systematically (including those of ethics and sustainability) and creatively to solve problems and/or make decisions, but with limitations in techniques or approach.	Limited research or advanced scholarship to their area of study by using a range of information and established and advanced techniques	Competent understanding of solving problems, through own research or advanced scholarship displaying a comprehensive understanding of established and advanced techniques	Good understanding of solving problems through own research and advanced scholarship critically selecting and displaying a comprehensive understanding of established and advanced techniques.	Very Good problem-solving skills displaying a comprehensive understanding of techniques applicable to their own research or advanced scholarship	Excellent range of extremely well-developed problem-solving displaying an understanding of techniques applicable to their own research or advanced scholarship beyond which is taught.	Exceptional problem-solving skills with sophisticated evaluation and application of a wide range of advanced information and techniques to undertake projects.
Comprehensive understanding of techniques applicable to their own research or advanced scholarship	Little to no understanding of techniques applicable to their own research or advanced scholarship or their limitations and ambiguities.	Low understanding of techniques applicable to their own research or advanced scholarship including their limitations and ambiguities.	Limited understanding of key techniques applicable to their own research or advanced scholarship including their limitations and ambiguities.	Competent understanding of techniques applicable to their own research or advanced scholarship including their limitations and ambiguities	Good understanding of techniques applicable to their own research or advanced scholarship and a some understanding of more specialised techniques.	Very good understanding of techniques applicable to their own research or advanced scholarship and a some understanding of more specialised techniques.	Excellent understanding of techniques applicable to their own research or advanced scholarship and mastery of some more specialised areas.	Exceptional understanding of techniques applicable to their own research or advanced scholarship and mastery of some more specialised areas.

RESEARCH & ANALYSIS								
	FAIL			PASS				
Threshold Criteria	0-29%	30-39%	40-49%	50-59%	60-69%	70-79%	80-89%	90-100%
Systematic understanding of knowledge, and a critical awareness of current problems and/or new insights, much of which is at, or informed by, the forefront of their academic discipline, field of study or area of professional practice	Little to no knowledge of the subject with limited breadth or depth or deficiencies in major areas or currency.	Low knowledge of the subject lacking coherence, breadth, or detail with only some reference to ideas or arguments at the forefront of any part of the subject.	Limited knowledge to deal with terminology, facts and concepts some of which is informed by the forefront of defined areas of the subject.	Competent knowledge of ideas or arguments at the forefront of any part of the subject sufficient to deal with current issues in the discipline, generally more descriptive than critical or analytical.	Good knowledge of ideas or arguments at the forefront of any part of the subject showing a clear, critical insight into the discipline as whole and current issues/problems.	Very good knowledge of ideas or arguments at the forefront of the subject some of which are significantly beyond what has been taught and show a critical insight into the discipline and current issues/problems.	Excellent knowledge of ideas or arguments at the forefront of the subject many of which are significantly beyond what has been taught and show a critical insight into the discipline and current issues/problems.	Exceptional knowledge of ideas or arguments at the forefront of the subject most of which are significantly beyond what has been taught and show a critical insight into the discipline and current issues/problems.
Conceptual understanding that enables the student to display originality in the application of knowledge	Little to no conceptual understanding or argument and a focus on descriptive explanations which do not comment on arguments of others or alternative views.	Low conceptual understanding and arguments are weak or poorly constructed, and the work does not critically evaluate the arguments of others or consider alternative views.	Limited conceptual understanding and argument construction with critical evaluation of alternative views or comment on advanced scholarship.	Competent conceptual understanding and argument construction with critical evaluation of a range of views and consistent engagement with advanced scholarship.	Good conceptual understanding which critically evaluate and synthesise other views and information with a thoughtful interpretation of advanced scholarship.	Very good conceptual understanding which systematically synthesises a wide range of views with a critical insight into advanced scholarship.	Excellent conceptual understanding which critically apply a wide range of views through a perceptive use of advanced scholarship.	Exceptional conceptual understanding of publishable quality with systematic engagement and usage of advanced scholarship.

ENGAGING WITH PRACTICE								
	FAIL			PASS				
Threshold Criteria	0-29%	30-39%	40-49%	50-59%	60-69%	70-79%	80-89%	90-100%
Practical understanding of how established techniques of research and enquiry are used to create and interpret knowledge in the discipline	Little to no evidence of background investigation, analysis, research, enquiry, ethical awareness, and/or study.	Low evidence of background investigation, analysis, research, enquiry, ethical awareness, and/or study.	Limited background investigation, analysis, research, enquiry, ethical awareness, and/or study using established techniques, with the ability to extract relevant points.	Competent investigation, analysis, research, enquiry, ethical awareness, and/or study using established techniques accurately, and can critically appraise and use academic sources.	Good background investigation, analysis, research, enquiry, ethical awareness, and/or study using established techniques accurately, and possesses a well-developed ability to critically appraise a wide range of sources.	Very good, independent, extensive and appropriate investigation, analysis, research, enquiry, ethical awareness, and/or study beyond the usual range, and critically evaluates this to advance the work and/or direct arguments.	Excellent independent, extensive and appropriate investigation, analysis, research, enquiry, ethical awareness, and/or study well beyond the usual range, and critically evaluates this to advance the work and/or direct arguments.	Exceptional investigation, analysis, research, enquiry, ethical awareness, and/or study which demonstrates carefully considered depth and breadth and critically synthesises this to advance the work and/or direct arguments.
Originality in the application of knowledge	Little to no technical, creative or artistic skills related to their area of study.	Low technical, creative or artistic skills related to their area of study.	Limited technical, creative or artistic skills required for area of study.	Competent technical, creative or artistic skills required for area of study.	Good technical, creative or artistic skills required for area of study.	Very good range of technical, creative or artistic skills.	Excellent range of technical, creative or artistic skills	Exceptional range of technical, creative or artistic skills
Independently advance your own knowledge and understanding, and to develop new skills to a high level.	Little to no contribution to group activity and/or undertaking further training at a high/advanced level.	Low contribution to group activity and/or undertaking further training at a high/advanced level.	Limited contribution to group activity and/or undertaking further training at a high/advanced level.	Competent contribution to group activity and/or independently undertakes further training at a high/advanced level.	Good contribution to group activity and/or independently undertakes further training at a high/advanced level with an understanding of team roles	Very good contribution to group activity and/or independently undertakes further training at a high/advanced level with an understanding of team roles	Excellent contribution to group activity and/or independently undertakes further training at a high/advanced level with teamwork and leadership	Exceptional contribution to group activity and/or independently undertakes further training at a high/advanced level with teamwork and strong leadership.

Threshold Criteria	0-29%	30-39%	40-49%	50-59%	60-69%	70-79%	80-89%	90-100%
Independently advance your own knowledge and understanding, and develop new skills to a high level.	Little to no contribution to group activity and/or undertaking further training at a high/advanced level.	Low contribution to group activity and/or undertaking further training at a high/advanced level.	Limited contribution to group activity and/or undertaking further training at a high/advanced level.	Competent contribution to group activity and/or independently undertakes further training at a high/advanced level.	Good contribution to group activity and/or independently undertakes further training at a high/advanced level with an understanding of team roles	Very good contribution to group activity and/or independently undertakes further training at a high/advanced level with an understanding of team roles	Excellent contribution to group activity and/or independently undertakes further training at a high/advanced level with teamwork and leadership	Exceptional contribution to group activity and/or independently undertakes further training at a high/advanced level with teamwork and strong leadership.
Qualities and transferable skills necessary for employment requiring: (a) the exercise of initiative, ethical and personal responsibility (b) decision-making in complex and unpredictable contexts	Little to no ability to manage learning and/or exercise initiative, ethical and personal responsibility and/or decision-making in complex and unpredictable situations	Low ability to manage learning and/or exercise initiative, ethical and personal responsibility and/or decision-making in complex and unpredictable situations	Limited ability to manage learning and exercise initiative, ethical and personal responsibility, and decision-making in complex and unpredictable situations	Competent ability to manage learning, and exercise initiative, ethical and personal responsibility, and decision-making in complex and unpredictable situations	Good ability to systematically manage learning, and exercise initiative, ethical and personal responsibility, and decision-making in complex and unpredictable situations	Very good ability to systematically manage learning, and exercise initiative, ethical and personal responsibility, and decision-making in complex and unpredictable situations.	Excellent ability to manage learning on own initiative, and exercise initiative, ethical and personal responsibility, and decision-making in complex and unpredictable situations	Exceptional ability to manage learning on own initiative, and exercise initiative, ethical and personal responsibility, and decision-making in complex and unpredictable situations
	Little to no use of appropriate terminology, limited vocabulary and many errors in spelling, grammar and syntax.	Low use of appropriate terminology, with many errors in spelling, vocabulary and syntax.	Limited expression, style and appropriate vocabulary with errors in spelling, grammar and syntax which affect understanding.	Competent expression, style, and appropriate vocabulary with some errors in spelling, grammar and syntax which do not affect understanding.	Good expression, style and appropriate vocabulary with some errors in spelling, grammar and syntax.	Very good expression, style and appropriate vocabulary with minimal errors in spelling, grammar and syntax.	Excellent expression, style and appropriate vocabulary with minimal errors in spelling, grammar and syntax.	Exceptional expression, style and appropriate vocabulary with no errors in spelling, grammar and syntax.
